

Alex van Heusden

UX/UI Designer

15 March 1991, Amsterdam

Profile

A calm but enthusiastic, empathic and pixel-perfect UX/UI designer. I specialize in conceiving, creating a well-suited user experience and making sure you get a website, app or software that connects with your userbase.

Skills

Figma / Sketch / Adobe XD / UX Design / Software Design / App Design / Wireframing / Prototyping / Adobe Photoshop / HTML / CSS / Wordpress / User Testing / Teamplayer / Taking charge of a developer team

Hobbies & Interests

Watching and playing football, watching series, working out in the gym, spending time with my girlfriend, friends and family, playing videogames and building Wordpress websites in my spare time.

Experience

SafetyFirst (VeiligWerk)

December 2022 - December 2023 | Weesp

Redesigned the web software and app, keeping it recognisable for the existing user base. My efforts focused on improving user-friendliness by incorporating design patterns and making the system more intuitive. Leading a multicultural development team, following Agile principles for efficient project management. I also established a design system and maintained it by adding new components.

Decos

October 2021 - May 2022 | Noordwijk

Designing new software product for municipalities in The Netherlands. Working closely together with my other UX colleagues, developers from India, productowners and stakeholders. Using and expanding design system while keeping WCAG guidelines in mind.

Joheco Automatisering

November 2018 - October 2021 | Hillegom

Front-End Development: HTML/CSS/Javascript in Angular environment UX Design: Concepting, wireframing, prototyping, research (web products)

Extra

December 2019 - July 2020 | Utrecht

At Slachtofferhulp Nederland I worked in a team of developers as an UX specialist. I tested the new CRM system that was being build on accessibility, and led improvements on how to make the system more userfriendly.
